

# Sniff'n'Stop Testimonials

## **SNIFF'n'STOP Caulk, Putty and Odorant Pads**

Now the squirrels stay out, the skunks stay out, even fire ants aren't a problem anymore. The difference can be traced directly to our use of Sniff'N'Stop, and the difference has been remarkable. It's safe enough to use in residential areas, even the pests aren't hurt, they just leave our equipment alone. Sniff'N'Stop has proven to be the best and safest way to control the pests that cause the outages.

Regarding the spiders, there's now no cobwebs, nothing in the areas we are using Sniff'N'Stop products. There's nothing, no activity, no nothing.

Eric McCollum  
Blue Ridge Elec., SC

Wild mustangs were our worst wood chewing problem. They regularly chewed the 6"x6" wood columns of their run-in shed down to 3"x3"s in a matter of weeks. No product that we tried stopped their ravenous chewing for more than two days. Until we applied Sniff'N'Stop Chewing Deterrent. Its been several years since the Sniff'N'Stop application. There has been no indication of further wood chewing in the Sniff'N'Stop treated areas.

## **SNIFF'n'STOP Asphalt-Enhanced Polymer Paint**

I used your Sniff'n'Stop spray paint product to repel pigeons here at the Transportation Services building at Santee Cooper. For the last several years these pigeons would come here and build their nest and then reproduce new pigeons. They were constantly making a mess over the sidewalk with their waste. Since spraying your product on the area where they come in and nest, we have not seen any pigeons. This has been over 6 months ago and no more pigeons at all.

I would highly recommend your product and its effectiveness.

Matthew W. Driggers (Mackie)

### **SNIFF'n'STOP Sponges**

I placed the Sniff'N'Stop sponge in a street light that I'd replaced late last year. I mean this is an area where nearly every street light is chewed. Where I expected to find squirrel damage there wasn't even a bug in there. You could eat off the inside of the globe that we put in there it was so clean. The stuff really works!

### **SNIFF'n'STOP Odorant Pads**

Sniff'N'Stop truly saved the day! I kept hearing scratching sounds in my attic when I worked in my office upstairs. It creeped me out! I had to get to the bottom of what the heck was making the noises. To my surprise and horror, I found out there were bats over my ceiling and in the rafters of our house! We talked about doing a lot of things, sought out "professionals" who wanted \$500 to \$5,000 to rid us of our problem. We didn't have that kind of money so we continued our discussion. Then my upstairs office began to smell like a bat cave. I am not Bat Girl, so I was very distressed. It got hard to work up there especially as it got warmer outside. That is when my husband found out about Sniff'N'Stop by ICorp. We had a grandson living with us, three dogs and a cat so poisons were not an option, not to mention, killing bats is illegal in Alabama. Sniff'N'Stop got rid of the bats in one application, after they were gone my son and husband used the Odorant Pads to keep the bats out. The bats have been gone for over a year and we have not had anymore problems. The process was inexpensive and effective. And, I now no longer feel the urge to hum the Batman Theme song every time I climb the stairs to go to work. Thank you Sniff'N'Stop and thank you Phil Landers!

### **SNIFF'n'STOP RV Kit**

The product you sent me worked great. It even kept the mosquitoes and moths to a minimum inside the camper. I will definitely spread the word. I know of Several RV'ers that are interested in the product from last season. I think you're on to something.
